PAR-Q and YOU

(A Questionnaire for People Aged 15 to 69)

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 to 69, the Par-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly. Check YES or NO.

YES	NO	
❑	❑	**1. Has your doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?**
❑	❑	**2. Do you feel pain in your chest when you do physical activity?**
❑	❑	**3. In the past month, have you had chest pain when you are not doing physical activity?**
❑	❑	**4. Do you lose your balance because of dizziness or do you ever lose consciousness?**
❑	❑	**5. Do you have a bone or joint problem (for example, back, neck, knee, or hip) that could be made worse by a change in your physical activity?**
❑	❑	**6. Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart condition?**
❑	❑	**7. Do you know <u>any other reason</u> why you should not do physical activity?**

if you answered

YES to one or more questions

Talk with your doctor by phone or in person BEFORE you start becoming much more physically active or BEFORE you have a fitness appraisal. Tell your doctor about the PAR-Q and which questions you answered YES.

- You may be able to do any activity you want—as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.
- Find out which community programs are safe and helpful to you.

NO to all questions

If you answered NO honestly to <u>all</u> PAR-Q questions, you can be reasonably sure that you can:

- start becoming much more physically active – begin slowly and build up gradually. This is the safest and easiest way to go.
- take part in a fitness appraisal – this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively. It is also highly recommended that you have your blood pressure evaluated. If your reading is over 144/94, talk with your doctor before you start becoming much more physically active.

DELAY BECOMING MUCH MORE ACTIVE:

- If you are not feeling well because of a temporary illness such as a cold or a fever – wait unit you feel better; **or**
- If you are or may be pregnant – talk to your doctor before you start becoming more active.

PLEASE NOTE: If your health changes so that you then answer YES to any of the above questions, tell you fitness or health professional. Ask whether you should change your physical activity plan.

<u>Informed use of the PAR-Q:</u> The Canadian Society for Exercise Physiology, Health Canada, and their agents assume no liability for persons who undertake physical activity, and if in doubt after completion of this questionnaire, consult your doctor prior to physical activity.

<u>NOTE:</u> If the PAR-Q is being given to a person before he or she participates in a physical activity program or a fitness appraisal, this section may be used for legal or administrative purposes.

"I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction."

Informed Consent

Please Fill Out All Information Requested Below

I, (print name) _____ , give my consent to participate in the physical fitness evaluation program conducted by **SaraRyan Fitness**.

BENEFITS

Participation in a regular program of physical activity has been shown to produce positive changes in a number of organ systems. These changes include increased work capacity, improved cardiovascular efficiency, and increased muscular strength, flexibility, power and endurance.

RISKS

I recognize that exercise carries some risk to the musculoskeletal system (sprains, strains) and the cardiorespiratory system (dizziness, discomfort in breathing, heart attack). I hereby certify that I know of no medical problem (except those noted below) that would increase my risk of illness and injury as a result of participation in a regular exercise program.

TESTING AND EVALUATION RESULTS

I understand that I will undergo initial testing to determine my current physical fitness status. The testing will consist of completing this health inventory, taking a step test or bicycle ergometer test for cardiovascular fitness, and being tested for muscular fitness and body composition.

I further understand that such screening is intended to provide **SaraRyan Fitness** with essential information used in the development of individual fitness programs. I understand that my individual results will be made available only to me. I also understand that the testing is not intended to replace any other medical test or the services of my physician. I will be provided a copy of all test results. I may share the results with whomever I please, including my personal physician. By signing this consent form I understand that I am personally responsible for my actions during my tenure at **SaraRyan Fitness** , and that I waive the responsibility of this center if I should incur any injury as a result of my negligence.
